## TABLES DES MATIÈRES

### FASCICULE 1, JANVIER 1962

1. The reptilian forebrain. – III. Cross connections between the olfactory bulbs and the cortical areas in the turtle F. ORREGO . . . . .	Pag. 1
2. The reptilian forebrain. – IV. Electrical activity in the turtle cortex. F. ORREGO and D. LIENBY . . . . .	17
3. Respiratory neurones in the Goldfish. R. von BAUMGARTEN and G. C. SALMOIRAGHI . . . . .	31
4. Behavior and reflexes of chronic striatal cats. G. H. WANG and K. AKERT . . . . .	48
5. Activity of single units in the primary optic cortex in the unanaesthetized rabbit during visual, acoustic, olfactory and painful stimulation. T. LÖMO and A. MOLLIKA . . . . .	86
ANALYSES . . . . .	121

### FASCICULE 2, MARS 1962

1. Recherches sur les structures nerveuses et les mécanismes responsables des différentes phases du sommeil physiologique. M. JOUVET . . . . .	Pag. 125
2. Effects of arousal upon incrementing waves evoked by cortical stimulation. C. LOEB, G. MASSAZZA and G. STACCHINI . . . . .	207
3. Blood pressure during natural sleep and during sleep induced by electrical stimulation of the brain stem reticular formation. O. CANDIA, E. FAVALE, A. GIUSSANI and G. F. ROSSI . . . . .	216
4. Enhancement of EEG synchrony in the acute "cerveau isolé". E. BIZZI and W. A. SPENCER . . . . .	234
5. Palpebral asymmetry in the dark adapted owl ( <i>Athene noctua</i> ) following unilateral irreversible visual deafferentation. G. BERLUCCHI and P. STRATA . . . . .	248
6. Somatotopic organization of the postural responses to stimulation and destruction of the caudal part of the fastigial nucleus. O. POMPEIANO . . . . .	259
ANALYSES . . . . .	272

## FASCICULE 3, JUIN 1962

1. Glycogen content in the heart of immunosympathectomized animals. R. LEVI-MONTALCINI, P. U. ANGELETTI and R. H. LEE . . . . .	Pag. 275
2. Role of the pupil in changes in evoked responses along the visual pathways. J. AFFANNI, M. MANCIA and P. L. MARCHIAFAVA . . . . .	287
3. Orientation reactions in the midpontine pretrigeminal cat. J. AFFANNI, P. L. MARCHIAFAVA and B. ZERNICKI . . . . .	297
4. Conditioning in the midpontine pretrigeminal cat. J. AFFANNI, P. L. MARCHIAFAVA and B. ZERNICKI . . . . .	305
5. EEG and behavioral manifestations of sleep induced by cutaneous nerve stimulation in normal cat. O. POMPEIANO and J. E. SWETT . . . . .	311
6. Identification of cutaneous and muscular afferent fibers producing EEG synchronization or arousal in normal cats. O. POMPEIANO and J. E. SWETT . . . . .	343
7. The effect of adrenaline on muscle spindles in cat. I. CALMA and G. L. KIDD . . . . .	381
A. M. DI GIORGIO (1897-1961) . . . . .	394

## FASCICULE 4, OCTOBRE 1962

1. Étude d'un phénomène d'inhibition de Wedenski au niveau cortical. F. BREMER et N. STOUPEL . . . . .	Pag. 399
2. A method for the quantification of tonic activity in the nervous system. A. ARDUINI and L. R. PINNEO . . . . .	415
3. Properties of the retina in response to steady illumination. A. ARDUINI and L. R. PINNEO . . . . .	425
4. Response patterns of olfactory bulb neurons. M. MANCIA, R. von BAUMGARTEN and J. D. GREEN . . . . .	449
5. Reticular control of single neurons in the olfactory bulb. M. MANCIA, J. D. GREEN and R. von BAUMGARTEN . . . . .	463
6. Cerebellar control of flexor motoneurons. An analysis of the postural responses to stimulation of the paramedian lobule in the decerebrate cat. L. MAFFEI and O. POMPEIANO . . . . .	476
7. Effects of stimulation of the mesencephalic tegmentum following interruption of the rubrospinal tract. L. MAFFEI and O. POMPEIANO . . . . .	510
ANALYSES . . . . .	526
